

GolexCoin Whitepaper Summary (Updated)

Abstract

GolexCoin is a decentralized digital currency fully backed by real-world real estate. Built on the Ethereum blockchain (ERC-20), it provides long-term value, transparency, and security without an ICO or speculative issuance.

Vision

To build a stable, asset-secured ecosystem enabling borderless transactions and backed exclusively by tangible real estate.

Token Overview

Name: GolexCoin

Symbol: GOLEX

Standard: ERC-20

Total Supply: 21 Trillion Tokens

Asset Backing Model

Each GolexCoin token is fully backed by income-generating real estate only. Properties include residential homes, shops, restaurants, and hotels legally held by GolexCoin Real Asset Holdings Ltd. All assets are registered, appraised, and transparently reported.
